H1N1 Virus

Dear Parents and Carers,

A Deanmore Primary School student has been diagnosed with H1N1 virus (Swine Flu).

The Western Australian Health Department has advised us to notify the school community.

Please take the normal precautions for any infection. If your child is not well please keep your child at home and seek medical attention if flu like symptoms persist.

We would appreciate it if you would keep the school informed of any confirmed cases of H1N1 in the school population.

Thank you

Jeanette Metcalf
Principal

Greg Downes
Deputy Principal
